

State of California

Budgetary / Legal Basis Annual Report

*For the Year Ended
June 30, 2002*

Steve Westly
California State Controller

STEVE WESTLY
California State Controller

March 6, 2003

**To the Citizens, Governor, and Members
of the Legislature of the State of California:**

I hereby submit the State of California's *Budgetary/Legal Basis Annual Report* for the year ended June 30, 2002. This report shows the financial condition of all funds and the results of their operations for the fiscal year ended June 30, 2002.

California's General Fund, the State's primary funding source for general government services, ended the 2001-02 fiscal year with a negative fund balance of \$2.1 billion. This is the first year since 1995-96 that the General Fund ended the fiscal year with a deficit balance. The balance consists of \$2.3 billion in reserves and a deficit of \$4.4 billion in the unreserved-undesignated portion of the fund balance. The reserves represent the portion of the fund balance that is not available for appropriation or that is legally set aside for specific uses, while the unreserved-undesignated portion represents the amount available without restrictions to fund the subsequent year's budget. The Special Fund for Economic Uncertainties (the "rainy day fund") was fully depleted, resulting in a zero balance at the end of the fiscal year.

This report is prepared in compliance with state laws and procedures in conformance with the State's budget. I have also issued the *Comprehensive Annual Financial Report*, prepared in conformance with accounting principles generally accepted in the United States of America (GAAP), which may in some instances differ from the budgetary basis annual report. The GAAP report is primarily intended to meet the needs of users outside of state government. A reconciliation between these two bases of accounting is contained in the GAAP report.

I wish to express my appreciation to all the state agencies for their cooperation and continued efforts to submit timely reports. I am also grateful to the members of my staff for their professionalism and hard work.

Sincerely,

A handwritten signature in black ink that reads "Steve Westly".

STEVE WESTLY
California State Controller

Notes to the Financial Statements

NOTE 1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The accompanying financial statements present the financial position and the results of operations of the State for the year ended June 30, 2002. These statements have been prepared in compliance with state laws, state accounting procedures, and the state budget.

The State of California also prepares a separate report, the *Comprehensive Annual Financial Report*, which includes financial statements prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). A copy of this report is available at: www.sco.ca.gov or from the State Controller's Office, Division of Accounting and Reporting, P. O. Box 942850, Sacramento, California 94250-5875.

The State of California *Budgetary/Legal Basis Annual Report* presents information on those financial activities of the State over which the Governor, the Legislature, and other elected officials have direct or indirect governing and fiscal control. The financial statements in this report include accounts of various boards, commissions, agencies, authorities, retirement systems, and the State's public universities. The funds from which these entities operate are included in this report in accordance with Government Code Section 12461(b)(3), which requires the *Budgetary/Legal Basis Annual Report* to include statements showing the receipts, disbursements, and closing balances of each fund in the State Treasury.

The University of California, including its various branches, is administered by a Board of Regents as a public trust. It is subject only to such legislative control as may be necessary to ensure compliance with the terms of the endowments of the University and the security of its funds. The financial transactions of the University of California that are included in this report are only the amounts appropriated by the Legislature for support and capital outlay. Expenditures from these appropriations are included as part of the cost of state government.

The financial transactions of district agricultural associations, citrus fairs, and county fairs are included only with regard to the disbursement of state funds appropriated for their use. These associations and fairs are semi-independent and operate with both state and local funds.

B. Fund Accounting

The diverse nature of governmental operations and the need to comply with legal provisions require that the accounts of the State be organized on the basis of funds rather than the single set of accounts commonly used by commercial enterprises.

Each fund is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts comprised of its assets, liabilities, fund equity, revenues, and expenditures or expenses, as appropriate.

These funds of the State are divided into two main groups: Governmental Cost Funds and Nongovernmental Cost Funds.

Governmental Cost Funds consist of those funds that receive revenues derived from taxes, licenses, and fees. Expenditures of these funds represent the cost of government. There are two major fund classifications in this group: the General Fund and Special Funds. The purpose of each fund classification is described below.

The *General Fund* is the main operating fund of the State, consisting of moneys that are not required by law to be deposited in any other fund.

Special Funds are used to account for resources that are legally restricted for particular functions or activities of government. The following are classified as special funds.

- *General Fund Special Accounts* are legislatively created accounts within the General Fund to account for revenues that are restricted by law for specific purposes. The accounts are treated as special funds and are excluded from the General Fund for accounting and budgetary purposes.
- *Feeder Funds* are the depositories for the collection of major taxes prior to clearance to the General Fund. The resources and obligations of these funds that apply to the General Fund as of June 30 are included in Due from Other Funds. Resources and obligations remaining in any of these funds represent collections that were not available to the General Fund on June 30.
- *Transportation Funds* are used to account for revenues that are restricted by law to transportation and related public safety programs.
- *Other Governmental Cost Funds* are used to account for other revenues that are restricted by law for specific purposes.

Nongovernmental Cost Funds consist of those funds that derive their revenue from sources other than general and special taxes, licenses, fees, or other state revenues. Expenditures of these funds do not represent a cost of government. There are three major fund classifications under this group: Bond Funds, Trust and Agency Funds – Federal, and Other Nongovernmental Cost Funds. The purpose of each fund classification is described below.

Bond Funds are used to record proceeds from the sale of general obligation bonds and expenditures for acquisition of property, capital outlay, or loans to local agencies for the same purposes.

Trust and Agency Funds – Federal are used to account for moneys that are received from the federal government to be expended for specific purposes.

Other Nongovernmental Cost Funds are used to account for the following revenues and services.

- *Public Service Enterprise Funds* are used to account for the transactions of state-operated enterprises that render services primarily to the public for a charge.
- *Working Capital and Revolving Funds* are used to account for the internal service activities rendered by a state agency for other state agencies or local governments.
- *Retirement Funds* are used to account for contributions received by various retirement systems, the investment of these moneys, retirement allowances, and refunds to members.
- *Trust and Agency Funds – Other* are used to account for moneys and properties that are received and disbursed by the State as trustee or custodian.

C. Measurement Focus and Basis of Accounting

Governmental cost funds are presented using the flow of current financial resources measurement focus. With this measurement focus, operating statements present increases and decreases in net current assets.

The accounts of the governmental cost funds are reported using the modified accrual basis of accounting. Revenues of the governmental cost funds are recognized according to the provisions of Government Code Sections 13302-13303. Revenues are accrued if the underlying transaction has occurred as of the last day of the fiscal year and the due date for the tax is within two months of the end of the fiscal year. Receivables for which collection is indefinite are fully reserved until collected or determined to be uncollectible.

Expenditures of governmental cost funds include obligations incurred but not paid by June 30. This includes all interfund settlements due but not completed at the end of the fiscal year. Encumbrances (such as obligations in the form of purchase orders, contracts, or salary commitments chargeable to an appropriation) at year-end are excluded from the liabilities and expenditures and are established as a reserve for encumbrances against the fund balance. Transfers from governmental cost funds to nongovernmental cost funds are shown as expenditures of the governmental cost funds in the fiscal year covered by this report, even though actual expenditures from the nongovernmental cost funds may not occur until a later date (e.g., transfers to the Architecture Revolving Fund for capital outlay purposes).

The measurement focus for nongovernmental cost funds varies among fund types. Proprietary fund types and pension trust funds are presented using the flow of economic resources measurement focus; the other fund types are presented using the flow of current financial resources measurement focus.

The basis of accounting for the nongovernmental cost funds also varies among fund types. The accounts of the proprietary fund types and the pension trust funds are reported using the accrual basis of accounting. Under the accrual basis, revenues are recognized when they are earned and expenses are recognized when they are incurred. The accounts of the other fund types are reported using the modified accrual basis of accounting.

D. Fixed Assets

Fixed assets are reported only for nongovernmental cost funds. They are reported at cost or estimated historical cost. Donated fixed assets are stated at fair market value at the time of donation. Interest during construction is not capitalized. Also, public domain or "infrastructure" fixed assets are not capitalized.

General fixed assets for governmental cost funds are reported as expenditures at cost in the year purchased.

E. Long-Term Obligations

The State Constitution permits the State to issue general obligation bonds for specific purposes and in such amounts as approved by a two-thirds majority of both houses of the Legislature and by a majority of voters in a general or direct primary election. Proceeds from the sale of general obligation bonds, including premium and accrued interest, are recorded in the Bond Funds. The debt service for general obligation bonds is appropriated from the General Fund. Premium and accrued interest received when bonds are sold is transferred to the General Fund to reimburse the debt service. Under the State Constitution, the General Fund is used, first, to support the public school system and public institutions of higher education. The General Fund can then be used to service the debt on outstanding general obligation bonds. Self-liquidating bonds reimburse the General Fund for the debt service provided on their behalf.

F. Fund Equity

The term *fund balance* is defined as the excess of the assets of a fund over its liabilities. Part or all of the total fund balance may be reserved as a result of law or generally accepted accounting principles. Reserves represent those portions of the fund balance that are legally segregated for specific uses.

Contributed Capital represents the amount of capital contributed to proprietary funds, including permanent working capital advanced by other funds that is not required to be repaid.

Reserved for Encumbrances represents goods and services that are ordered, but not received, by the end of the year.

Reserved for Employees' Pension Benefits represents reserves of the retirement funds. These reserves include accumulated contributions made by employees and employers, and undistributed interest and investment earnings.

Reserved for Unencumbered Balances of Continuing Appropriations represents the unencumbered balance of all appropriations for which the period of availability extends beyond the period covered by this report. These appropriations are legally segregated for a specific future use.

Reserved for Deposits represents the balance of trust and agency funds outside the State Treasury that accounts for money or property held by state agencies that is not required to be deposited in a fund in the State Treasury.

Reserved for School Loans represents the amount of outstanding school loans authorized by Chapter 703, Statutes of 1992, and Chapter 66, Statutes of 1993, and deferred to be repaid from future General Fund appropriations. These loans were treated as General Fund expenditures in the year the appropriations were legislated. Repayment of these loans was completed in July 2001.

Other Reserves represents the amounts reserved for other specific purposes.

The *Special Fund for Economic Uncertainties* was created by Chapter 139 of the Statutes of 1985 and is funded with General Fund revenues. Commonly known as the "rainy day fund," it provides the moneys for those necessary expenditures throughout the year that have not been anticipated or provided for in the annual budget. It also provides relief, to the amount of its available funds, for any budgeted shortfalls. As of June 30, 2002, the balance of the Special Fund for Economic Uncertainties was fully depleted by a transfer of \$2.5 billion to the General Fund. This transfer was made in accordance with Section 16418 (b) of the Government Code to reduce the General Fund deficit.

The *Contingency Reserve for Economic Uncertainties* represents the unappropriated balance in each special fund, as of June 30, that is available for appropriation in the following fiscal year.

Unreserved-Undesignated represents the net of the total fund balance less reserves. A negative unreserved-undesignated balance must be funded before any amount is available for appropriation.

Included in the fund equity are the balances of all appropriations for which the availability for encumbrance and expenditure expired before or at the end of the fiscal year covered by this report.

G. Pooled Money Investment Account Loans

Cash temporarily idle during the year is invested in the Pooled Money Investment Account (PMIA). The investment of the PMIA is restricted by law to certain categories, including loans to various bond funds. Outstanding loans to the various bond funds as of June 30 are reflected as PMIA Loans Payable in the bond funds and as PMIA Loans Receivable in each fund group in the Combined Balance Sheet of this report. PMIA Loans Receivable are not reflected in the individual fund statements of this report because the loans were made directly from the PMIA, and the specific funds providing the loans are not identifiable.

H. Comparative Statements

This report includes the Comparative Statement of Actual and Estimated Revenues and the Comparative Statement of Actual and Budgeted Expenditures for the year ended June 30, 2002. The Comparative Statement of Actual and Estimated Revenues compares the actual governmental cost fund revenues earned with the estimated revenues reflected in Schedule 8, Comparative Statement of Revenues, of the 2002-03 Governor's Budget Summary. The Comparative Statement of Actual and Budgeted Expenditures compares the actual governmental cost fund expenditures incurred with the total appropriations for the 2001-02 fiscal year.

I. Appropriations Limit

The State is subject to an annual appropriations limit imposed by Article XIIIIB of the California Constitution. Article XIIIIB established a limit on the growth of certain appropriations made from state tax revenues, adjusted annually for inflation and population growth. All tax revenue received was to have been appropriated within the limit or returned to the taxpayers. Proposition 98 and 99 were approved by voters in the November 1988 general election, and Proposition 111, which was approved by voters in the June 1990 general election, amended Article XIIIIB.

Proposition 98 required that tax revenues received in excess of the state appropriations limit be allocated to school districts and community colleges (K-14) rather than returned to the taxpayers. The amount to be allocated is not to exceed 4% of the minimum school funding level. Effective in the 1988-89 fiscal year, Proposition 98 provides a guaranteed minimum level of funding for school districts and community colleges. The K-14 programs are guaranteed either the same percentage of General Fund revenues appropriated in the 1986-87 fiscal year, or the state and local tax revenues received in the prior year adjusted for changes in the cost of living and enrollment, whichever is greater.

Proposition 99, the Cigarette Tax Initiative, placed an additional tax on cigarette purchases in California. Before the enactment of Proposition 99, an additional tax would have been considered revenue subject to the appropriations limit. This initiative specified that these additional tax revenues are not subject to the appropriations limit and dedicated the revenue for specific purposes.

Proposition 111 provided that tax revenues received in excess of the state appropriations limit in one fiscal year may be carried over to the succeeding fiscal year. The portion of the excess revenues carried over that cannot be appropriated in the succeeding fiscal year would be considered excess revenues. Fifty percent of all excess revenues must be allocated to school districts and community colleges, and the other 50% must be returned to the taxpayers. Prior to the enactment of Proposition 111, the maximum amount to be allocated to school districts and community colleges was 4% of the minimum school funding level. Proposition 111 excludes from the State's appropriations limit

appropriations for the costs of natural disasters, appropriations for all qualified capital outlay projects, and appropriations of revenue derived from increases in motor vehicle fuel taxes, sales and use taxes on the increased motor vehicle fuel taxes, and weight fees.

Article XIIIIB imposed no limit on appropriations or funds obtained through nontax sources such as reasonable user charges or fees and bond proceeds. The state appropriations limit is also exclusive of certain appropriations, such as debt service on voter-approved debt, debt existing when Article XIIIIB was adopted, and state subventions to local governments that are not restricted in their use. State appropriations to local governments are considered tax proceeds for local entities and are subject to each local entity's revenue and appropriations limit.

The appropriations limit is established each year in the Budget Act and is amended during the fiscal year for transfers of fiscal responsibility between the State and the local governments. The Budget Act provides that any judicial action or proceeding to attack, review, set aside, void, or annul the revenue and appropriations limit must begin within 45 days of the effective date of the act. There have not been any such judicial actions or proceedings.

J. Cash Management

As part of its cash management program, the State issues short-term obligations known as Revenue Anticipation Notes (RANs) and Revenue Anticipation Warrants (RAWs) to meet cash flow needs during the fiscal year. On October 4, 2001, the State issued \$5.7 billion in RANs for the 2001-02 fiscal year. Additionally, on June 28, 2002, the State issued \$7.5 billion in RAWs to fund, in part, the repayment of the 2001 RANs. This is the first time since 1994 that the State issued RAWs. The RAWs were subsequently repaid on October 25 and November 27, 2002.

NOTE 2

BUDGETARY AND LEGAL COMPLIANCE

The State's annual budget is prepared primarily on a modified accrual basis for governmental funds. The Governor recommends a budget for approval by the Legislature each year. This recommended budget includes estimated revenues; however, revenues are not included in the budget adopted by the Legislature. Under state law, if recommended expenditures exceed estimated revenues, the Governor shall recommend the sources from which the additional revenues should be provided.

Under the State Constitution, money may be withdrawn from the State Treasury only through a legal appropriation. The appropriations contained in the Budget Act, as approved by the Legislature and signed by the Governor, are the primary sources of annual expenditure authorizations and establish the legal level of control at the appropriation level for the annual operating budget. The budget can be amended throughout the year by special legislative action, budget revisions by the Department of Finance, or executive orders by the Governor.

Amendments to the initial budget for the year ended June 30 were legally made and are included in the budget data in the financial statements. The amendments had the overall effect of decreasing spending authority and expenditures for the year.

Appropriations are generally available for expenditure or encumbrance either in the year appropriated or for a period of three years if the legislation does not specify a period of availability. At the end of the availability period, the encumbering authority for the unencumbered balance lapses. Some appropriations continue indefinitely, while others are available until fully spent. Generally, encumbrances must be liquidated within two years from the end of the period when the appropriation is available. If the encumbrances are not liquidated within this additional two-year period, the spending authority for the encumbrances lapses.

In November 1988, voters of the State approved Proposition 98, a constitutional amendment called the Classroom Instructional Improvement and Accountability Act. Proposition 98 establishes a minimum funding level or guarantee for education. The amount guaranteed depends on a number of factors, according to formulas specified in Section 8 of Article XVI of the State Constitution. Expenditures are recognized for all Proposition 98 appropriations in the year funds are appropriated.

Legislative appropriations are based on when commitments for goods and services are incurred. However, for financial reporting purposes, the State reports expenditures based on the year goods and services are received.

State agencies are responsible for exercising basic budgetary control and ensuring that appropriations are not overspent. The State Controller's Office is responsible for overall appropriation control and does not allow expenditures in excess of authorized appropriations.

Financial activities are mainly controlled at the appropriation level but this can vary, depending on the presentation and wording contained in the Budget Act. Certain items that are established at the category, program, component, or element level can be adjusted by the Department of Finance. While the financial activities are controlled at various levels, the legal level of budgetary control has been established in the Budget Act at the appropriation level for the annual operating budget.

NOTE 3

LONG-TERM OBLIGATIONS

A. Capital Appreciation Bonds

The State issued capital appreciation bonds in the amount of \$17 million with a delivery date of April 1, 1993. The bonds were issued in denominations of principal amounts per \$1,000 value, payable in full at maturity. Unlike all other bonds issued by the State, these bonds are not subject to redemption prior to their stated maturities, and no current interest payments will be made prior to maturity. In the General Obligation Bonds, Interest and

Redemption statement, the accreted value is included in the “Bonds Outstanding” column and the “Issued” column. The accreted value represents the portion of the face value of the bonds that reflects principal and interest accrued to date. For June 30, the accreted value will be interpolated on a straight-line basis between the accreted value for the immediately preceding April 1 and the next succeeding October 1, as displayed in the official bond statement. As of June 30, 2002, the accumulated interest of the bonds outstanding was \$5.5 million.

B. Defeased Bonds

The State has defeased certain bonds by placing the proceeds of new bonds in irrevocable escrow in a special trust account with the State Treasury to provide for all future debt service payments on the old bonds. Accordingly, the assets of the trust accounts and the liability for the defeased bonds are not included in the State's financial statements. As of June 30, 2002, general obligation bonds outstanding in the amount of approximately \$3.0 billion are considered defeased.

C. Commercial Paper Notes

The general obligation commercial paper program was established pursuant to Chapter 697, Statutes of 1995. Under this program, the State issues general obligation commercial paper notes that may be renewed or may be refunded by the issuance of general obligation bonds. Commercial paper notes are deemed issued upon authorization by the respective finance committees.
